

**Dora Amoako**

**Lawrence Gulroy**

**Christopher Vasiliades**

**Group Four Projects Details**

- We will extract data using a web API from Spotify (<https://developer.spotify.com/documentation/web-api/>) and a csv from Kaggle of the top 50 Spotify songs from 2019 (<https://www.kaggle.com/leonardopena/top50spotify2019>).
- We will select the artists from the csv and then run queries for these artists in the Spotify API to extract information about them.
